

Assistance Brief

E-Mobility Europe is a trade association that vouches for the transition to electric mobility across Europe. It brings together over 80 members including electric vehicles (EV) associations, vehicle manufacturers, fleet owners and technology to advocate for a successful transition that benefits both people and industries.

We can be of key assistance to the Council of the EU.

1

Simulation of impacts

Wonder what impact the different targets could have on your economy, people and industries?

Ask E-Mobility Europe for a simulation report! Our economists' can assess risk, model outcomes, and quantify the real-world impact across sectors.

2

Implementation Assistance

You like the bill but wonder how feasible it is to implement its target?

E-Mobility Europe can help you design realistic step-by-step action-plans!

3

Assistance in legal drafting

Where to put the right comma? What scope should definitions take to insure the biggest take up for EV?

Reach out to E-Mobility and its legal drafters to ensure high-quality amendments !

Together, we can drive change for Europe's future !
