

PATRIOTS FOR EUROPE - TRAN COMMITTEE

Statement on the closing of trilogue negotiations

On the eve of the final vote in the plenary session, the Patriots for Europe (PfE) group expresses its satisfaction with the outcome of the provisional agreement on the corporate vehicles regulation. The negotiations have delivered a balanced, pragmatic text that respects economic realities. Our group believes that the current text responsibly meets our core demands for protecting small and medium-sized enterprises, simplifying administration, and preserving the economic sovereignty of Member States.

On the social and budgetary front, the agreement reflects a realistic framework that successfully avoids the pitfalls of centralized economic dirigisme. By ultimately respecting Member States' prerogatives, the text shields national budgets and the commercial management of private fleets from disproportionate constraints.

Finally, we are pleased with the protection this provides to European industry and to the *Made in Europe*.

For us, this provisional agreement constitutes a coherent, protective, and stabilizing compromise. We look forward to the Parliament's final decision on Friday.

Titouan Augié, France MEP for Patriots for Europe, Committee on Transport and Tourism (TRAN)
